SURYA ANISH K

Python Full-Stack Developer | Web Developer | Machine Learning Enthusiast

+91 81210 21005 | Suryakudupudi888@gmail.com | Hyderabad, Telangana, India
LinkedIn: surya-anish-6a2458227 | GitHub: Suryaa-k | Portfolio: surya-anish.onrender.com

PROFESSIONAL SUMMARY

Software Developer skilled in designing, developing, and deploying full-stack applications. Proficient in modern programming languages, frameworks, and database management, with a strong emphasis on writing modular code and building responsive, user-centric architectures. Proven ability to quickly master new technologies,and optimize backend and frontend components for maximum speed and scalability.

TECHNICAL SKILLS

Programming Languages: Python, Java.
Frontend & Design: HTML5, CSS3, JavaScript, React.js, UI/UX Design, AutoCAD, StarUML.
Backend Development: Django, REST API, Tkinter, Postman.
Databases & Analytics: MySQL, MongoDB, Data Analysis, Power BI.
Tools & Platforms: Git, GitHub, VS Code, Antigravity.
AI & Generative AI: Prompt Engineering.
Certifications: Python Full-Stack, SQL, Web Development, Artificial Intelligence
Engineering Core: Data Structures & Algorithms, Code Design, Project/User Manual Documentation.

PROFESSIONAL EXPERIENCE

CV Corp, Hyderabad, India **2025 – 2026**

Python Full-Stack Developer Intern

- Developed and maintained full-stack web applications using Python (Django) and ReactJS, improving overall code maintainability by 30%.
- Built and consumed REST APIs to integrate front-end interfaces with back-end services, reducing data retrieval time.
- Collaborated with cross-functional teams to deliver 3+ client-facing features within agile sprint cycles.
- Wrote clean, documented Python scripts for data processing and automation tasks, reducing manual effort by 40%.

EDUCATION

Malla Reddy Institute of Technology and Science (JNTUH), Hyderabad **2021 – 2025**

Bachelor of Technology - Computer Science and Engineering

Coursework: Web Technologies, Software Engineering, Data Structures and Algorithms, Database Management Systems

TECHNICAL PROJECTS

Detection of Cyber Attacks in Networks using ML Techniques **2024 – 2024**

Malla Reddy Institute of Technology and Science, JNTUH

- **Tech Stack:** Python, Tkinter, Pandas, NumPy, Scikit-learn, Keras, Ensemble Learning
- Designed and implemented a real-time network intrusion detection system using ensemble ML methods, achieving 94% accuracy in classifying both known and novel cyberattacks.
- Developed automated response mechanisms and behavioral analysis modules that reduced false-positive alerts
- Built a Tkinter-based desktop GUI to visualize threat data and monitoring dashboards for non-technical users.

Detection of Parkinson's Disease through Analysis of Image and Speech Data using AI/ML **2024 – 2025**

Malla Reddy Institute of Technology and Science, JNTUH

- **Tech Stack:** Python, TensorFlow/PyTorch, OpenCV, Natural Language Processing, Scikit-learn, Ensemble Learning
- Developed a serverless dual-modality diagnostic system that analyzes brain MRI images and speech patterns to detect early signs of Parkinson's Disease with high clinical relevance.
- Implemented image segmentation to identify structural abnormalities in the substantia nigra and voice feature extraction (pitch, phonation, rhythm) for speech impairment analysis.
- Reduced diagnostic uncertainty compared to traditional methods by combining two independent data sources in one ML pipeline.
